Foreword

THIS REPORT continues the annual release of Medicare enrollment figures begun with data for 1966. The number of persons insured under the two parts of the Health Insurance for the Aged and Disabled program—hospital insurance and supplementary medical insurance—are shown primarily for July 1, 1973, by age, race, and sex, and by place of residence. Monthly new enrollments, and the monthly terminations, chiefly through death, are also shown. Selected data are included for enrollment since the program began. The figures will provide the population base for rates of utilization of medical services covered under the program and published in other reports of the annual Medicare series.

This report is the first in the series that presents information on the characteristics and geographic distribution of disability beneficiaries under age 65 covered by Medicare. The Social Security Amendments of 1972 (Public Law 92–603) extended Medicare coverage to the disabled effective July 1, 1973.

Many individuals in the Social Security Administration have assisted with the development of this series. The preparation of the reports is a function of the Division of Health Insurance Studies of the Office of Research and Statistics under the supervision of Howard West, director, and Aaron Krute, deputy director. This report was the responsibility of Martin Ruther, Program Statistics Branch. Important contributions for the tabulation and presentation of the statistical content were made by Robert Dickerson, Robert J. Butler, and Kathryn D. Barrett. Computer services were provided by the Division of Health Insurance Statistical Data, Bureau of Data Processing. The General Tables were produced by the "System for Automated Tabular Composition," a computer system at the Social Security Administration headquarters. They were photo typeset on Linotron equipment at the Government Printing Office.

2.3	Persons 65 years and over enrolled as of July 1, by type of coverage, age, census region, division, and metropolitan–nonmetropolitan residence	2–22
2.4	Persons 65 years and over enrolled as of July 1, by type of coverage, race, sex, population size groups of standard metropolitan statistical areas, and for each area of 500,000 or more in 1970, United States	2–24
2.5	Persons 65 years and over enrolled by type of coverage, age, race, sex, and month of coverage	2–27
2.6	Persons 65 years and over ever enrolled for hospital and/or medical insurance, by age, race, sex, census region, division, and State of residence	2–31
2.7	Disability beneficiaries enrolled as of July 1, by type of coverage, age, race, sex, census region, division, and State of residence	2–40
2.8	Disability beneficiaries enrolled as of October 1, by type of coverage, age, race, sex, census region, division, and State of residence	2–49
2.9	Disability beneficiaries enrolled as of July 1, by type of coverage, age, census region, division, and metropolitan–nonmetropolitan residence	2–58
2.10	Disability beneficiaries enrolled as of October 1, by type of coverage, age, census region, division, and metropolitan–nonmetropolitan residence	2–59
2.11	Disability beneficiaries enrolled as of October 1, by type of coverage, race, sex, population size groups of standard metropolitan statistical areas, and each area of 500,000 or more in 1970, United States	2–60
2.12	Disability beneficiaries enrolled by type of coverage, age, race, sex, and month of coverage	2–63
2.13	Disability beneficiaries ever enrolled during 1973 for hospital insurance, by age, race, sex, census region, division, and State of residence	2–65

THE STATISTICAL SYSTEM OF THE MEDICARE PROGRAM

This publication is a section of a series of statistical reports produced from the Medicare program's administrative records. Data are presented on a calendar year basis, describing services rendered in the year. The series includes sections on the number and characteristics of enrollees; on the characteristics of participating providers; on inpatient care in hospitals and skilled nursing facilities; on the use of outpatient hospital, home health, and physicians' and other medical services; and overall summaries of utilization and expenditures.

The primary objective of these reports is to provide data to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount, kind, and expenditures for the various types of medical care services (described above) used by three populations; persons aged 65 and over; persons under 65 entitled to disability insurance benefits for at least 24 consecutive months; and persons under age 65 who are "deemed disabled" because they require continuing dialysis or kidney transplantation for treatment of chronic end-stage renal disease.[1] The applications by hospitals, skilled nursing facilities, home health agencies, independent laboratories, suppliers of portable X-ray and outpatient physical therapy services, and dialysis or transplant centers to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the services utilized under Medicare and the demographic characteristics of individual enrollees.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available statistics. First, the beneficiary and his medical experience under the program form the basic unit for which data are collected. Second, records for each bill paid under the program and records of diagnoses and surgical procedures for a sample of beneficiaries are maintained on a centralized basis. Diagnoses and surgical procedures are recorded only where inpatient hospital, outpatient hospital, skilled nursing facility or home health services are utilized. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are prepared centrally.

THE BASIC RECORDS

The statistical system is based on four related computer records: the health insurance master file, provider record, hospital insurance (Part A) utilization record, and the medical insurance (Part B) payment record.[2]

THE HEALTH INSURANCE MASTER FILE

The health insurance master file identifies each aged or disabled person eligible for health insurance benefits and indicates whether he is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both.

This record is used to create a health insurance card that is sent to each insured persons. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for each of the two parts of the Medicare program. The entitlement record also contains information about each individual's age, sex, race, and State and county of residence.

The entitlement records provide the population data for each part of the program which serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, skilled nursing facility (formerly termed extended care facility), independent clinical laboratory, supplier of portable X-ray or outpatient physical therapy services and dialysis or transplant center must apply for participation in the Medicare program. Data on the application forms are stored in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of institutions and facilities that furnish care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance (HI) program requires that two items of information be

[1] For more detailed information on persons covered by Medicare and the nature of covered services, see "Provisions of the Law and Regulations."

[2] Prior to 1973, another record was part of the statistical system. This record contained information on the utilization of and charges for specific physician and other services covered under the supplementary medical insurance program. The information was obtained from bills paid by intermediaries to or on behalf of a continuous 5-percent sample of persons enrolled for SMI. This sample was temporarily suspended for services provided after 1972. For a detailed description of the medical insurance sample see *Medicare, Health Insurance for the Aged, 1970, Section 2: Enrollment* (Washington, D.C.: U.S. Government Printing Office, 1973) p. vii.

known about each person at the time of his admission to a hospital--his entitlement under the program and the extent to which he has used the benefits available to him.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration's central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days of inpatient care to which he is entitled during his current "benefit period."[3]

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record. As part of the later process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number.

Admission and billing forms are handled in a comparable manner by home health agencies and skilled nursing facilities. The outpatient billing form is also transmitted to the Social Security Administration for entry in the central record after payment by the intermediary. Diagnoses and surgical procedures are also coded for samples of beneficiaries using such services. The samples vary by type of service and are 40 percent for home health services and 5 percent for outpatient hospital services. For skilled nursing care, all bills are coded.

All the information on utilization experience in hospital and skilled nursing facilities that is needed to administer the "benefit period" provision is recorded centrally. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or skilled nursing facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to HI utilization.

[3] A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing facility for 60 continuous days.

PAYMENT RECORD FOR MEDICAL INSURANCE

Reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills with allowed charges in excess of $60 (the deductible amount) during a calendar year.

For the enrolled population, carriers need to know from a central source the amount of the deductible that has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the SMI program, the Social Security Admministration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable form of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

The payment record also contains the beneficiary's claim number. Thus, it can be linked with the records for other types of services used by the beneficiary and with the entitlement record to provide a summary of each individual's utilization and reimbursement under Medicare.

The payment record also contains selected items of information needed to supply an efficient basis for drawing samples of the bills. These items provide a sampling frame that may be used to draw samples designed to obtain additional specific information about services used and reimbursed under the SMI program.

As previously indicated, the payment record is limited to cases where some reimbursement is made under the SMI program, i.e., where an individual has previously incurred covered services having allowed charges in excess of the deductible amount ($60) during the calendar year. Payment records are not submitted for beneficiaries who use some services under the medical insurance program but not enough to exceed the deductible. Such data are collected by means of the Current Medicare Survey (CMS), with data made available in a separate series of reports. CMS also provides information on noncovered services used by Medicare beneficiaries.[4]

[4] For a complete description of CMS see Jack Scharff, "Current Medicare Survey: The Medical Insurance Sample," *Social Security Bulletin*, April 1967.

Characteristics of the Total Enrolled Population, 1973

On July 1, 1973, 23.5 million aged and disabled persons were insured under Medicare. Those aged 65 and over numbered 21.8 million while the remainder were 1.7 million disability beneficiaries less than 65 years old. Disability beneficiaries became eligible for Medicare under the 1972 Social Security Amendments (Public Law 92–603). The amendments extended Medicare coverage, effective July 1, 1973, to people under age 65 entitled to cash benefits under the social security or railroad retirement programs because of disability. Coverage was limited to beneficiaries entitled to disability benefits for at least 24 consecutive months. About 22.2 million aged and disabled persons were covered by both hospital (HI) and supplementary medical insurance (SMI). Another 1.1 million were entitled only to HI benefits. Nearly one-quarter million persons aged 65 and over were enrolled only for SMI benefits. (Persons under 65 years old are not eligible for SMI coverage only.) The enrollment of the aged and disabled by type of coverage was:

Type of coverage	Enrollment (in thousands)		
	Total	65 years and over	Under 65 years
Hospital insurance and/or supplementary medical insurance	23,545	21,815	1,731
Hospital insurance	23,301	21,571	1,731
Supplementary medical insurance	22,491	20,921	1,570
Hospital insurance and supplementary medical insurance	22,246	20,676	1,570
Hospital insurance only	1,055	894	161
Supplementary medical insurance only	244	244	—

This report presents data on the characteristics of the aged and disabled population in the Medicare program in 1973, and discusses changes in enrollment since the start of the program on July 1, 1966. The general tables present data separately for aged and disabled enrollees by type of coverage, age, race, sex, and State of residence. In addition, table 2.1 shows combined aged and disabled enrollment by type of entitlement and State of residence. Included with all disability beneficiaries are persons eligible solely because of chronic renal disease. The counts of aged enrollees refer to July 1, 1973, and disabled enrollees to October 1, 1973 to provide a population base for measures of utilization of medical care services under the Medicare program. Enrollment of the disabled on July 1, 1973 is also shown to provide data at the start of Medicare for the disabled. Also included are tables showing enrollment by month, and the total number of persons enrolled at any time during 1973.

During the 7-year period from 1966–73, HI enrollment among the aged increased 13.0 percent (from 19.1 million to 21.6 million) reflecting the growth of the population aged 65 and over (table A). Almost every aged person is eligible for HI without paying a premium, but enrollment in the SMI program is voluntary and the enrollee is required to pay a premium.[1] There were 20.9 million SMI enrollees on July 1, 1973, or 18.0 percent more than when the program began. The number of persons 65 years and over entitled only to HI benefits decreased in 1973 to a record low of 894,000. The decline was caused by the large number of persons who elected SMI coverage during the general enrollment period (GEP) that ran from January through March 1973, with coverage beginning July 1, 1973. SMI enrollment increased during this GEP because the 3-year time limit for SMI enrollment had been removed by the 1972 amendments (see Provisions of the Law).

For purposes of analyses and to maintain historical continuity, enrollment data by State of residence will continue to be shown by census region and division. In addition, as requested by the Office of Management and Budget, beginning with this report a table by standard Federal administrative regions is shown (table B).

[1] For estimates of the number of aged not covered by Medicare, see U.S. Bureau of the Census, Census of Population and Housing: 1970 Evaluation and Research Program PHC(E)–4, "Estimates of Coverage of Population by Sex, Race, and Age: Demographic Analyses" (Washington, D.C.: U.S. Government Printing Office, 1973.)

HI Enrollment of the Aged

Type of entitlement.—Persons enrolled in the HI program may be described by the characteristics recorded in the Health Insurance Master (HIMA) record file—age, race, sex, place of residence, and type of entitlement. About 93 percent of the persons entitled to HI benefits were receiving or were eligible for social security benefits (table C), and 4 percent were receiving or were entitled to railroad retirement benefits. Some 318,000 persons were entitled to both social security and railroad retirement cash benefits because of earnings under both programs. These persons are reported both as entitled to social security benefits and as entitled to railroad benefits, but are counted only once in the figures in table C for all enrolled persons. The balance of the enrolled population (4 percent) were not entitled to receive cash benefits under either social security or railroad retirement, and are classified as "other enrolled persons." This group is entitled to HI coverage under the transitional provision of the law. Under this provision, persons attaining age 65 need not be fully insured for social security but must have a specified number of quarters of covered employment to be eligible for HI. For persons who attained their 65th birthday before 1968, no quarters of coverage were required; in 1968, 3 quarters; in 1969, 6; in 1970, 9; in 1971, 12; in 1972, 15; and in 1973, 18. By 1974 for women and 1975 for men, the HI transitional provision will no

longer apply since the same number of quarters of coverage will be required for entitlement to cash retirement benefits and HI benefits.

The steady decline in the number of "other enrolled persons" from 1.5 million on July 1, 1967, to .9 million by July 1, 1973, resulted primarily from the number of deaths exceeding new enrollments in this group. Thus, the number of new enrollments (aged 65–66) decreased from 122,000 in 1968 to 9,000 in 1973. The decline reflects the requirement that the newly enrolled acquire a greater number of work credits each year beginning with those who attained age 65 in 1968.

Except for the proportion of persons with race not reported, there were only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries (table C). Race was not reported for 26 percent of the railroad retirement beneficiaries in contrast to 1 percent for social security beneficiaries. Persons classified as "other enrolled," however, had a relatively high proportion (73 percent) of women, of persons 80 years and over (36 percent) and of persons reported as members of "all other races" (19 percent).

Age, race, sex.—There were more women enrolled in HI than men at every age, and the ratio of women to men increased with advancing age because of their greater longevity (table C). A secondary factor is the declining proportion of foreign born in the population 65 years and over. The majority of immigrants who came to the United States in the 1880's to the 1920's were men and those surviving are mainly 65 years of age and over.[2] At ages 65–66, 54 percent of the HI population were women. This proportion rose to 67 percent at ages 85 and over. The rising proportion of women to men with advancing age

Pacific	2,555	12.1	12.3	10.0	100.0	90.8	6.7

[1] Includes race unknown, not shown separately.

was similar for both the white population and among those of all other races.

The median age of the white population was slightly higher (0.4 years) than that for all other races. The greater longevity of women raised the median age of women 1.3 years above that for men. By race, 89 percent of the enrolled population was classified as white; 8 percent as members of all other races; and for 3 percent race was not reported:

Race and sex	Aged persons enrolled in HI (in thousands)	Percent	Median age (in years)
Total HI enrollees	21,571	100.0	73.1
Men	8,911	41.3	72.4
Women	12,660	58.7	73.7
White	19,242	89.2	73.1
Men	7,915	36.7	72.5
Women	11,326	52.5	73.6
All other races	1,762	8.2	72.7
Men	779	3.6	72.1
Women	983	4.6	73.2
Race unknown	567	2.6	74.6
Men	216	1.0	71.1
Women	350	1.6	77.8

Geographic distribution.—For the HI population, the most populous region was the South (31 percent) while the West had the smallest proportion (16 percent) of HI enrollees (table D). By division, the greatest proportion of the HI population resided in the Middle Atlantic and the East North Central States, with each having nearly 20 percent of all HI enrollees. The Mountain States had the smallest percentage of HI enrollees (4 percent). The same distribution held for the white population, but for persons of all other races, 57 percent lived in the South.

With the exception of the South, the proportion of whites exceeded 90 percent of total HI enrollees in all geographic divisions. In the three divisions of the South, the white population accounted for between 79 and 84 percent of HI enrollees.

Two-thirds of the persons covered by hospital insurance were living in a metropolitan county. The percentage distribution by region and division for 1973 is:

Census region and division	All aged persons	Metropolitan counties		Non-metropolitan counties
		With central city	Without central city	
United States	100.0	53.1	14.8	31.5
Northeast	100.0	58.7	24.7	16.2
New England	100.0	55.0	22.7	22.1
Middle Atlantic	100.0	60.0	25.4	14.3
North Central	100.0	46.7	13.7	39.1
East North Central	100.0	54.9	15.3	29.2
West North Central	100.0	30.4	10.4	58.6
South	100.0	45.0	12.2	42.2
South Atlantic	100.0	49.7	13.9	35.9
East South Central	100.0	32.8	11.5	55.1
West South Central	100.0	45.8	10.0	43.7
West	100.0	71.4	6.0	22.0
Mountain	100.0	49.1	4.6	45.5
Pacific	100.0	78.2	6.5	14.9

The proportion of those living in metropolitan counties showed much variation by geographic area. The South had the lowest proportion of enrollees, 57 percent, living in metropolitan counties while the Northeast was highest with 83 percent. Nearly three-quarters of the HI enrollees who lived in a metropolitan county resided in the standard metropolitan statistical areas having a population of 500,000 or more in 1970 (table 2.4).

[1] Includes race unknown, not shown separately.

SMI Enrollment of the Aged

Age, race, and sex.—There was little difference in the distribution by race, sex, and median age of persons enrolled under the HI and the SMI program. This is to be expected since the proportion of HI enrollees also participating in SMI was 96 percent (table E). When Medicare began, only a small number of persons were eligible for SMI but not for HI (table A). The number of SMI enrollees expressed as a proportion of the number of HI enrollees, therefore, provided an adequate measure of participation in the voluntary part of the program. However, as the number of persons enrolled in SMI but not eligible for HI increased, enrollment in both HI and SMI as a proportion of HI enrollment has been computed as a more accurate indicator of SMI coverage.

The largest difference in the proportion of the aged HI population also enrolled in SMI was between races. For the white population, 96 percent of the persons enrolled for HI were also enrolled for SMI, about 6 percentage points more than for all other races. The excess for whites persisted in every age and sex group and was greatest, 11 percentage points, by 2-year age groups for those aged 65–66 and 8 percentage points by 5-year age groups for those aged 65–69. The percentage of HI enrollees also covered by SMI varied only slightly with sex, the participation of women being greater than that of men by about one percentage point. For 2-year age groups between 65 and 75, the lowest proportion was recorded for men at ages 65 and 66. It is likely that many men on attaining age 65 do not enroll for SMI because they are protected by employment-related medical insurance. By 5-year age groups the lowest and highest participation rates differed by less than 2 percentage points.

Geographic distribution.—On July 1, 1973, among HI enrollees residing in the United States 97 percent were also enrolled in SMI, or 1 percentage point higher than for all persons covered by HI (table F). The lower rate among the total population resulted from the inclusion of two groups of SMI-eligible persons with low participation residing in outlying areas such as Puerto Rico (see table 2.1) and in foreign countries. Medicare benefits are not ordinarily paid for services provided in foreign countries. In the outlying areas the average participation rate was only 55 percent. Factors such as lower income and differing arrangements for medical care in these areas probably account for the lower enrollment.

For all persons in the United States, the percent of HI enrollees with SMI coverage varied only about 1 percentage point among the geographic divisions, from 96.3 percent in the West South Central States to 97.6 percent in the New England States. The difference in participation rates by race varied only slightly among geographic divisions (2 to 7 percentage points) except for those in the Mountain States. There the proportion of persons of all other races enrolled for SMI was 12 percentage points

Table G.—Persons 65 years and over newly enrolled for hospital and medical insurance during 1973, by age, race, and sex

Race and sex	Aged 65 and over	65, 66	67, 68	69, 70	71, 72	73, 74	65–69	70–74	75–79	80–84	85 and over

lower than that for whites. This may reflect the relatively large proportion of American Indians in the area who receive free care. There was no difference in the proportion of HI enrollees with SMI coverage (98 percent) according to metropolitan-nonmetropolitan county of residence.

Aged Persons Newly Enrolled and Terminated in 1973

A total of 1,606,000 aged persons was newly enrolled under HI during 1973 (table G), an average of 134,000 a month. Nearly all additions to the rolls were persons who had just attained age 65. The provisions of the law for HI coverage also permit additions to the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. Effective July 1, 1973 HI enrollment for persons over 65 years of age resulted primarily from the initial enrollment of premium-HI eligibles. Additions to the SMI program totaled 1,806,000 persons, exceeding the number of those newly enrolled for HI by 200,000 persons. Additions to the SMI rolls were higher than for HI as a result of three factors: the general enrollment period, the State buy-in program, and the enrollment of persons in SMI who are ineligible for HI coverage.

The general enrollment period.—Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods (see Provisions of the Law). In the general enrollment period (GEP) which ran from January 1, 1973 to April 1, 1973, nearly 760,000 persons were identified as eligible to enroll. About 220,000 chose to do so with enrollment taking effect on July 1, 1973. The number enrolling during the GEP was unusually large apparently because the 3-year time limit for enrollment had been removed by the 1972 amendments.

The premium paid by persons enrolling for SMI was $6.30 a month on July 1, 1973. In addition, the monthly premium of persons who do not sign up in their initial enrollment period is increased by 10 percent for each full 12 months in which they could have but did not enroll. The increase also applies to persons re-enrolling 12 or more months after their first coverage was terminated. About 83 percent of those who enrolled during the 1973 GEP were subject to a 10 to 30 percent surcharge, or premium payments ranging from $6.90 to $8.20 a month.

"SMI only" enrollees.—The second group adding to SMI enrollment are those persons ineligible for HI coverage. There were 244,000 such persons on July 1, 1973, an increase of 27,000 persons since July 1, 1972. They were persons who lacked the required work credits for HI eligibility, including 28,000 active or retired Federal employees insured under the Federal Health Benefits Act of 1959, who may pay the premium to enroll for SMI but who are not entitled to HI. As expected, enrollees eligible only for SMI differed considerably from those protected by both parts of Medicare. "SMI only" eligibles were mainly persons who lacked the work credit requirement that began for those reaching age 65 in 1968 or later. Thus, 95 percent of those eligible only for SMI were less than 75 years of age compared to 60 percent of those covered by both programs. Because women are more likely to lack the work credit requirement they comprised 70 percent of SMI only eligibles compared with 59 percent of those covered by both programs. By race, SMI only eligibles contained higher proportions of persons of all other races, 16 percent, and persons classified race unknown, 8 percent; for those having both HI and SMI coverage the proportions were 8 and 3 percent, respectively. The distribution of enrollees eligible only for SMI by age, race, and sex is:

[In thousands]

Race and sex	Aged 65 and over	65, 66	67, 68	69, 70	65–69	70–74	75 and over

Race unknown	19	3	8	7	15	3	1
Men	5	—	2	1	3	1	1
Women	15	2	6	5	12	2	1

State "buy-in" agreements.—The third group adding to the rise in SMI enrollment resulted from the "buy-in" provisions of the law. At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90–248 extended eligibility effective April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting this arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands had signed buy-in agreements for particular categories to public assistance. No additional States or areas were added to the buy-in rolls since then (table H). However, 27 States and two areas had extended buy-in coverage to aged "medical indigents" eligible for medical assistance (Title 19). The medically indigent have income and assets larger than that required for public assistance but inadequate to pay their medical expenses. There were 2.5 million aged buy-ins ever enrolled during 1973 or 11 percent of all SMI enrollees. While data for July 1, 1973, are not available by State, figures for previous years have shown that the highest proportions of buy-ins were in six southern States: Mississippi, Alabama, Georgia, Arkansas, Texas, and Oklahoma.

Persons terminated.—Since termination of coverage occurs in the month after death, terminations in 1973 include deaths in the months of December 1972 through November 1973. During 1973, HI coverage was terminated for 1,250,000 persons who died (table J).

In calendar year 1973, 1,244,000 deaths were recorded among Medicare (HI and/or SMI) enrollees. Owing to differences in the population covered, and in the sources of the report of age at death, as well as delays in recording deaths in the Social Security Administration's file, these

[1] PA recipients entitled to OASDHI and RRB were covered under State "buy-in" agreements, except in Mass. and Wis. Coverage was effective July 1, 1966, except in Calif. and Guam where coverage of beneficiaries began Jan. 1, 1967, and July 1, 1968, respectively.

[2] Definition of title number: 1—old-age assistance; 4—aid to families with dependent children; 10—aid to the blind; 14—aid to permanently and totally disabled; and 16—aid to aged, blind, or disabled.

[3] Title 4 covered in Ark. effective Jan. 1, 1970; Fla., Feb. 1, 1970; Maine, Apr. 1, 1968; and Okla., Nov. 1, 1967.

[4] Titles 4, 10, and 14 covered in Del. effective May 1, 1968; Iowa, July 1, 1967; New Jersey, Jan. 1, Nov. 1, 1970; S. Dak., Jan. 1, 1968; Tenn., Dec. 1, 1969; Va., Sept. 1, 1969; and Wis., Apr. 1, 1968.

[5] Nevada does not have a title 14 program.

figures do not correspond exactly to data on deaths published by the National Center for Health Statistics.

Of persons entitled to HI, the death rate among aged white persons (57.5 per 1,000 enrolled for HI on July 1, 1973) was slightly higher than that of persons of all other races (56.9). The death rate for white persons was below that of all other races for those aged 65–79, but for those 80 years and over whites exceeded that of all other races, as shown below:

Age	Deaths of HI enrollees per 1,000 enrolled for HI	
	White	All other races
All persons	57.5	56.9
65–69	26.5	32.6
70–74	40.2	46.3
75–79	62.2	65.8
80–84	97.3	92.5
85 and over	175.8	139.8

About 1,235,000 aged persons were terminated from SMI in 1973, 97 percent as a result of death. Only 32,000 of the 20.9 million aged persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. While 98 percent of the terminations for white persons were a result of death, 93 percent of the terminations for all other races resulted from death and the remaining 7 percent withdrew.

Table J.—Persons 65 years and over whose health insurance was terminated during 1973 by race, sex, and reason for termination

Race and sex	Termination by death			Other supplementary medical insurance terminations
	Hospital and/or medical insurance	Hospital insurance	Supplementary medical insurance	
All persons	1,249,974	1,242,881	1,202,362	32,439

Women	25,776	25,455	24,760	1,129

Premium—HI coverage. Effective July 1, 1973, the 1972 Social Security Amendments permitted aged persons who are ineligible for HI to enroll voluntarily by paying a monthly HI premium. Eligibility for persons 65 and over requires only that enrollees be citizens or aliens residing permanently in the United States for the past 5 years. The HI premium was set at $33 a month for a 12-month period beginning July 1973. This amount represents the *full* premium cost of hospital coverage. In addition these premium-HI enrollees must also enroll for SMI if they have not already done so. This requirement reduces the possibility of excess usage of the more costly HI services if the enrollee was not covered by SMI.

During 1973, there were 12,314 people enrolled for premium-HI coverage (data for July 1, 1973 were not available). Women made up 78 percent of those enrolled. By race nearly 84 percent of these enrollees were whites, only 5 percent were of all other races and for 12 percent race was not known. Nearly half (46 percent) of premium-HI enrollees were aged 65 and 66. The distribution of persons enrolled for premium-HI during 1973 by race and sex is:

Race and sex	Premium–HI enrollees	
	Number	Percentage distribution
Total	12,314	100.0
Men	2,687	21.8
Women	9,627	78.2
White	10,283	83.5
Men	2,289	18.6
Women	7,994	64.9
All other races	617	5.0
Men	153	1.2
Women	464	3.8
Race unknown	1,414	11.5
Men	245	2.0
Women	1,169	9.5

Enrollment Growth of the Aged, 1966–1973

Both HI and SMI enrollment have increased in each of the 7 years of the Medicare program. Enrollment in the HI program grew from 19.1 million in 1966 to 21.6 mil-

lion in 1973, because persons aging into the program exceeded enrollees that died. SMI enrollment grew from 17.7 million in 1966 to 20.9 million in 1973. Nearly all persons 65 years and over are entitled to HI, while persons voluntarily enroll for SMI and must pay a premium. These factors account for differences in the size and the rate of growth of the two programs. Annual increases in HI enrollment ranged from 1 to 2 percent (table K), while for SMI enrollment increases ranged from 1 to 5 percent (table L). The jump in SMI enrollment from 1 percent between 1966 and 1967 to 5 percent between 1967 and 1968 was caused by the first general enrollment period which took effect on July 1, 1968. Until 1973, SMI enrollment increased by 2 percent annually. Between 1972 and 1973 SMI enrollment increased 3 percent reflecting the removal of the 3-year time limit for enrollment during the 1973 general enrollment period.

Hospital insurance.—Because women live longer than men, the sex characteristics of the Medicare population changed slightly in the first 7 years of the program. Between 1966 and 1973 the increase of HI enrollees was greater for women (16 percent) than for men (10 percent). As a result, the proportion of women to total enrollees increased slightly, as shown below:

Year	Men	Women
1966	42.6	57.4
1967	42.3	57.7
1968	42.1	58.0
1969	42.0	58.0
1970	41.8	58.2
1971	41.6	58.4
1972	41.4	58.6
1973	41.3	58.7

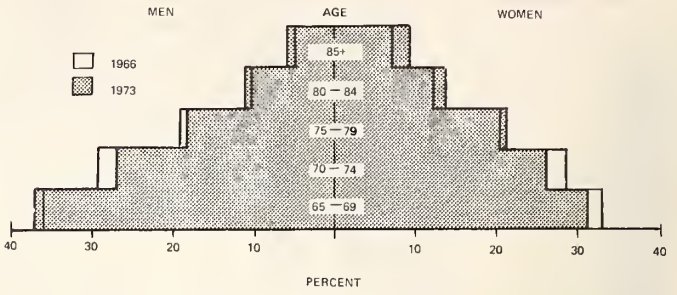
This change reflected primarily the relative growth in the number of women in the group aged 75 and over. Among those entitled to HI benefits in that group, the proportion that were women went from 60.1 percent to 62.9 percent, as shown by the following figures:

Age and sex	Percentage distribution of HI enrollment							
	1966	1967	1968	1969	1970	1971	1972	1973
Under 75	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Men	44.2	44.0	44.0	44.1	44.1	44.1	44.1	44.2
Women	55.8	56.0	56.0	55.9	55.9	55.9	55.9	55.8
75 and over	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Men	39.9	39.4	39.1	38.7	38.2	37.9	37.4	37.1
Women	60.1	60.6	60.9	61.3	61.8	62.1	62.6	62.9

The 13 percent growth in enrollment in the 7-year period varied by age and sex (chart 1). The proportion of women aged 75–79, 80–84, and 85 and over increased from 1966 to 1973 and decreased for ages 65–69 and 70–74. Among men, those in the age groups 65–69, 80–84, and 85 and over increased while those aged 70–74 and 75–79 decreased. These changes in the age distribution raised the proportion of persons aged 75 and over to the total HI population from 37 percent in 1966 to 40 percent in 1973. And the change in the sex distribution in the first 7 years of the program among those 75 years and over, increased the HI enrollment of women by 28 percent or more than double that of men.

Though enrollment of aged persons of all other races has increased at a faster rate than among whites, changes

Figure 1.– Percentage distribution of hospital insurance enrollees, by age and sex, 1966 and 1973



in the racial composition of the enrolled population have been small. Specifically, the proportion of persons other than white to the total aged was 7.6 percent in 1966 and 8.2 percent in 1973. The percentage distribution of enrollment by race follows:

Year	All persons	White	All other races	Race unknown
1966	100.0	89.3	7.6	3.1
1967	100.0	89.2	7.7	3.1
1968	100.0	89.2	7.7	3.1
1969	100.0	89.2	7.8	3.0
1970	100.0	89.3	7.9	2.8
1971	100.0	89.6	8.1	2.4
1972	100.0	89.6	8.0	2.3
1973	100.0	89.2	8.2	2.6

The greater longevity of women was again evident as the increase in enrollment among women was much larger than that of men for both white persons and those of all other races.

Changes in enrollment by geographic region depend not only on the number of persons aging into the program and the number of deaths among those aged 65 and over, but also on interstate migration of Medicare enrollees. Nearly 2 percent of all persons 65 years and over migrate between regions in a year, chiefly from the Northeast and North Central States to the South.[3]

All four regions showed annual increases from 1966 to 1973 in the number of persons entitled to HI benefits. The South had the largest numerical growth (1,120,000) and the highest relative increase (21 percent). Next was the West with an enrollment gain of 520,000 or 18 percent. The North Central and Northeastern States each had an increase of 7 percent.

These differences in enrollment growth during the period reported raised the South above the North Central States as the most populous region among persons aged 65 and over beginning in 1968.

Enrollment increased also in each of the 50 States between 1966 and 1973. The largest numerical rise was in Florida (363,000), and accounted for nearly one-third of the total growth of enrollment in the South. Much of Florida's growth probably came from the migration of

[1] Enrollment as of October 1.
[2] Consists of 50 States, the District of Columbia, and residence unknown.

the elderly from the Northeast and North Central States.[4] Five other States immediately below Florida in numerical growth between 1966 and 1973 were: California, 274,000; Texas, 178,000; Pennsylvania, 94,000; New York, 83,000; and North Carolina, 79,000. These six States represented 43 percent of the increase in HI enrollment between 1966 and 1973 but accounted for only 37 percent of the HI population in 1973. The District of Columbia had a 3 percent decline in enrollment probably caused by the migration of the elderly.[5] The Bureau of the Census also reported that for all persons 65 years and over the District of Columbia had a net outmigration between 1965 and 1970.[6] A distribution of percentage changes in enrollment

[4] William J. Nelson, "Interstate Migration of Aged Beneficiaries." Social Security Administration, Office of Research and Statistics, *Research and Statistics Note No. 3,* February 25, 1970. The study refers only to those aged social security beneficiaries receiving benefits on June 30, 1967. Unpublished tables for beneficiaries receiving benefits on June 30, 1970, June 30, 1971, and June 30, 1972, show similar trends.

[1] Includes District of Columbia.

Migration of persons 65 and over may be seen by comparing enrollment in counties that, according to the Bureau of the Census, have experienced large net in-migration or out-migration between the 1960 and 1970 Censuses. The migration of persons 65 years and over primarily to metropolitan resort or retirement areas as reported by the Bureau of the Census is reflected in the large increases (20 to 101 percent) in HI enrollment between 1966 and 1973 in the nine counties in Arizona, California, Florida, New Jersey, and New York shown below. Enrollment in counties with sizeable out-migration indicates that the movement of migrants is primarily from large metropolitan counties in the Northeast and North Central States. In 7 years, changes in HI enrollment varied from minus 10 percent to plus 6 percent in the 14 counties with the largest out-migration according to the Bureau of the Census.

[1] Counties with more than 15,000 migrants 65 years and over as measured by the 1960 and 1970 Census.

Source: Donald E. Starsinic "Geographic and Age Differentials in Population Growth, 1960–70," Proceedings of the 14th National Meeting of the Public Health Conference on Records and Statistics (Washington, D.C.: U.S. Government Printing Office, 1973).

All of the increase in the HI population between 1966 and 1973 occurred in metropolitan counties (table K). In revising standard metropolitan statistical areas, the Office of Management and Budget classified many nonmetropolitan counties to metropolitan counties without central cities. These revisions, effective in 1973, account for most of the changes in enrollment in these counties.

Changes in SMI Enrollment.—The annual increase in SMI enrollment (table L) generally exceeded that of HI (table K). As a result, for the 1966–73 period, SMI enrollment grew by nearly 1.3 times that of HI.

The higher rate of growth of SMI enrollment was reflected in the increase in the proportion of the HI population also enrolled in SMI. This percentage rose from 92.8 percent in 1966 to 95.9 percent in 1973 (table M). The proportion declined in 1967 because there was no general enrollment period. The ratio increased in 1968 and again in 1969 but remained virtually unchanged until 1973. The large affirmative response during the 1973 general enrollment period accounted for the increase in 1973 in the SMI participation rate.

When Medicare began, the proportion of the HI population also enrolled in SMI was 93.4 percent among white persons and 87.4 percent among persons of all other races, a difference of 6.0 percentage points. In 1967, SMI enrollment among whites increased while enrollment for all other races fell; as a result the difference in the proportion of the HI population also enrolled in SMI widened to 9.5 percentage points. Except for 1972 the growth of SMI enrollment among all other races has exceeded that of whites, so that the difference in participation rates by race has narrowed to less than 6 percentage points.

Regional differences in the proportion of HI enrollees also participating in SMI declined in 1968 and had almost disappeared since then. The figures in 1973 ranged from 97.3 percent in the North Central States to 96.5 in the South.

The participation rate among women continued to be a little above that for men.

HI Enrollment of the Disabled

Disability beneficiaries are eligible for Medicare either because they were entitled to 24 consecutive months of cash disability insurance benefits or because they had end-stage renal disease and met the entitlement provisions of Section 299I of the 1972 Amendments. On July 1, 1973, there were 1.7 million disability beneficiaries enrolled for Medicare (table N).

To receive disability insurance benefits under the social security program, persons must be unable to do any substantial gainful work due to medically determinable physical or mental impairments which can be expected to result in death or have lasted or can be expected to last for a continuous period of at least 12 months. There are three types of disability insurance beneficiaries entitled to Medicare:

1. disabled workers with sufficient quarters of cover-

age to be currently or fully insured under social security; [7]

2. persons disabled in childhood—prior to age 22—who are dependents of retired, disabled, or deceased beneficiaries; and
3. disabled widows or widowers of beneficiaries.

In addition, persons under age 65 with end-stage renal disease requiring dialysis or kidney transplantation are "deemed" disabled and thus entitled to Medicare if they meet the following qualifications:

1. they are currently or fully insured; or
2. entitled to monthly social security or railroad retirement benefits; or
3. they are spouses or dependent children of such insured or entitled persons.

Type of beneficiary.—The largest group of disability beneficiaries enrolled in HI were 1,372,000 disabled workers who accounted for 79 percent of all enrollees. The remainder were 284,000 adults disabled as children, 68,000 disabled widows and widowers, and 6,400 beneficiaries with end-stage renal disease (ESRD). The sex distribution of these four groups differed significantly. Men comprised 70 percent of disabled workers, reflecting their greater participation in the labor force, while about half of both persons disabled in childhood and those entitled because of ESRD were men. Among disabled widows and widowers less than 1 percent were men.

The proportion of persons classified as white ranged from 72 percent among ESRD enrollees to 88 percent among adults disabled in childhood. A relatively higher proportion of disability beneficiaries eligible for Medicare were members of all other races than was true in the general population aged 20–64. The proportions were 15 and 12 percent respectively.[8] The distribution of disability

[7] The number of quarters of coverage (QC) workers need depends upon their age at the time they become disabled. Persons under 24 years of age can be currently insured with 6 QC in the 12 calendar-quarter period immediately before the disability began. Persons 24 through 30 years old can be fully insured with QC in one-half of the quarters between age 21 and the calendar quarter in which the disability began. Persons 31 years or older can be fully insured with 20 QC out of 40 calendar quarters ending with the quarter in which the disability began.

[1] Represents persons eligible solely because of ESRD under Section 299I of the 1972 Social Security Amendments.

The age of the four types of beneficiaries differed markedly. Under Medicare, disabled workers, children, and widows "terminated" as disability insurance beneficiaries automatically become social security "retirement" beneficiaries upon attaining age 65. Beneficiaries with ESRD continue their Medicare entitlement after attaining age 65 because of their earlier eligibility. The highest median age was among disabled widows, 60.3 years, because Medicare coverage for this group is limited to those 52–64 years of age. The lowest median age, 38.7 years, was among those disabled in childhood.

The median age of all disabled men was 1 year less than that of women. The greatest difference in median age by sex was 1.7 years among those disabled in childhood. Differences in median age by race were small among disabled workers, widows, and ESRD beneficiaries. However, whites disabled in childhood were 6.3 years older on the average than those of all other races. The median age of all disability beneficiaries covered by Medicare, 55 years, was much older than the median age of 39 years of the U.S. population 20–64 years.[9] The median age of disability beneficiaries, by type of beneficiary, race, and sex, is as follows:

Race and sex	Median age				
	All disability beneficiaries	Workers	Children	Widows and widowers	End-stage renal disease only [1]
All persons	55.2	56.6	38.7	60.3	42.7
Men	54.8	56.3	37.9	60.8	42.2

All other races	54.5	55.6	32.9	59.9	41.2
Men	53.6	54.9	32.5	60.1	40.9
Women	56.0	57.0	33.4	59.9	41.4

[1] Represents persons eligible solely because of ESRD under Section 299I of the 1972 amendments.

The proportion of all disability beneficiaries increased in each successive 10-year age group (table N). This was true for both sexes and both racial groups. Among all disabled persons there were many more men than women in every age group, again reflecting the higher participation of men in the labor force.

Nearly half of all disability beneficiaries—both men and women as well as whites and members of all other races—were 55 to 64 years old, the age span during which the prevalence of chronic diseases increases sharply.[10] This has important implications for the Medicare program, both in terms of quantity of medical services used and related costs.

Geographic distribution.—By region, the distribution of disability beneficiaries covered by HI varied from 16 percent in the West to 38 percent in the South (table O). Nearly the same proportion of disability beneficiaries, 17–18 percent, lived in three geographic divisions: The South Atlantic, Middle Atlantic, and East North Central States. Among disabled beneficiaries of minority races, 53 percent, lived in the South, while the lowest proportion, 13 percent, lived in the West.

Whites represented between 85 and 92 percent of all disability beneficiaries enrolled for HI in all geographic divisions but the South. In the geographic divisions of the South, whites accounted for between 76 and 79 percent of disabled HI enrollees.

The distribution of disability beneficiaries by type of county was similar to that of the aged. Nearly two-thirds of the disabled enrolled for HI lived in metropolitan counties. By geographic division the Middle Atlantic States had the highest proportion, 83 percent, living in metropolitan counties while only 42 percent lived in such counties in the East South Central States. Of those disabled living in metropolitan counties nearly three-quarters of them were located in standard metropolitan statistical areas with 500,000 or more population in 1970 (table 2.11). The distribution by area of residence and type of county for 1973 is:

Census region and division	All disabled persons	Metropolitan counties		Non-metropolitan counties
		With central city	Without central city	
United States	100.0	50.9	13.8	33.6
Northeast	100.0	58.7	23.0	16.9
New England	100.0	57.1	20.0	22.1
Middle Atlantic	100.0	59.2	23.9	15.3
North Central	100.0	48.8	13.6	35.9

Mountain	100.0	48.5	4.7	44.5
Pacific	100.0	76.9	6.1	15.9

For the United States there were 14 disabled enrollees per 1,000 population aged 18 to 64. Above average rates were confined to the three divisions of the South with the highest rate, 20 per 1,000 persons, in the East South Central States. The lowest rate was 12 per 1,000 in the Mountain States. Variation in the ratio of enrollees to the population 18–64 years old was greater by State. The highest rate was 30 per 1,000 population in West Virginia and the lowest was 4 per 1,000 in Alaska. The number of

[1] U.S. Bureau of the Census, *Current Population Reports*, "Estimates of the Population of States by Age, July 1, 1973." P–25, No. 518 (Washington, D.C.: U.S. Government Printing Office, June 1974).

Beneficiaries with end-stage renal disease.—For persons with end-stage renal disease, the basis of their eligibility was determined as of April 1, 1974, the date SSA records were summarized.

Thus, as reflected in SSA records on April 1, 1974, there were 6,371 persons under age 65 entitled to Medicare on July 1, 1973, solely because they had ESRD and met the insured status requirements previously described (table P). For such persons elegibility for Medicare coverage begins with the third month after the month in which a course of dialysis begins. Eligibility may begin before completing this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting dialysis or receiving dialysis in preparation for transplantation. Excluded from the count of those eligible because of ESRD were 3,235 persons who were "dually" entitled to Medicare on July 1, 1973, because they met both the insured status requirements and were entitled to at least 24 consecutive months of disability insurance benefits.

Persons eligible because of ESRD who are receiving dialysis may not be entitled to disability insurance benefits because they are able to work. However, because of the catastrophically high cost of treatment these persons are also covered by Medicare. Yet not all persons with ESRD met the insured status requirements. By June 28, 1974, about a year after ESRD eligibility began, claims for Medicare coverage had been denied to 1,063 persons with renal disease because they failed to meet the insured status requirements.

ESRD beneficiaries by age, race, and sex.—The median age of persons entitled solely because of ESRD was 42.7 years. The median age of women with ESRD was 1.1 years more than that of men. By race the average age of whites was 43.5 years or 2.3 years more than persons of all other races. For both sexes, the number of ESRD

beneficiaries increased in each successive age group and reached a peak at ages 45–54.

By race, 72 percent of ESRD enrollees were classified as white, 19 percent were members of all other races and for 9 percent race was unknown. There were slightly more men than women for both racial groups.

The characteristics of beneficiaries who were dually entitled to Medicare because they were entitled to disability bnefits and had ESRD differed somewhat from those eligible solely because of ESRD. The dually entitled were older; 55 percent were aged 45 and over compared with 45 percent for those entitled solely because of ESRD. By sex, 70 percent of the dually entitled were men while the proportion of men among those solely eligible because of ESRD was 54 percent. The distribution of those persons with ESRD eligible for Medicare because they were entitled to at least 24 consecutive months of disability benefits and because they met the insured status requirements by age, sex, and race is:

Age, sex, and race	Disability beneficiaries with ESRD [1]	
	Number	Percent

[1] Excludes beneficiaries with end–stage renal disease eligible for Medicare solely because of Section 299I, the Social Security Amendments of 1972.

SMI Enrollment of the Disabled

The proportion of disabled HI beneficiaries enrolled in SMI was 90.7 percent at the start of Medicare for the disabled. The comparable rate for aged enrollees as of July 1, 1973, was somewhat higher, 95.9 percent. Even the proportion of SMI enrollment when Medicare began on July 1, 1966, was higher—92.9 percent.[11]

The increase in the proportion of the aged electing SMI may be related to their greater familiarity over the years with the Medicare program and its benefits. Perhaps the relatively high proportion of veterans of World War II and the Korean conflict among disability beneficiaries also helps explain the lower SMI participation rate. According to unpublished data from the Social Security Administration's Survey of the Disabled in 1966, 26 percent of disabled worker beneficiaries were veterans.[12] Veterans, especially those with severe disabilities, may have declined SMI enrollment because of required premium payments since they are frequently entitled to free medical care from the Veterans Administration.

Further evidence of the number of disabled veterans covered by Medicare may be found in the Current Medicare Survey of the disabled. This survey reported on the utilization of medical services in the second half of 1971 by disability insurance beneficiaries who would have met the eligibility requirements of the 1972 amendments. Of the estimated 16.6 million covered medical services used by those disabled, 3.9 million or nearly 25 percent of them were provided by the Veterans Administration and the Armed Forces.[13]

Type of beneficiary.—The largest variation in the HI disabled population enrolled for SMI was by type of beneficiary. The lowest proportion was among disabled workers, 89.8 percent (table Q) while the highest, as expected, was among those with ESRD, 98.3 percent. SMI enrollment was particularly high for persons with ESRD since most of their expenses for maintenance dialysis are expected to be covered by SMI rather than HI.

Disabled workers aged 35–44 showed the lowest proportion with SMI coverage (86.7 percent); this proportion increased slightly beginning at age 45 and was highest (92.6 percent) at ages 60–64 years. Beneficiaries disabled in childhood had higher participation rates than disabled workers in every age group. Possible reasons for lower enrollment rates among disabled workers compared to childhood disability beneficiaries can be found in data from the 1966 Social Security Study of the Disabled. This study

reported that among disability beneficiaries not in institutions, 46 percent of disabled workers had some type of health insurance compared with only 23 percent among the childhood disabled.[14] Apparently disabled workers obtained health insurance policies provided or paid for by an employer while only 15 percent of childhood disability beneficiaries had ever worked. Also, disabled workers were more likely to obtain coverage through their spouses; 71 percent of disabled workers were married while 98 percent of the childhood disabled had never married.[15]

There was little variation in rates by age for persons eligible solely because of end-stage renal disease. The rates ranged from 97.8 percent for those with ESRD aged 45–54 to 99.4 at ages 55–59.

Age, race, sex and residence.—There were no large differences by age, race, and sex in the proportion of disabled persons enrolled for HI who were also enrolled for SMI (table R). Only 4 percentage points separated the participation rate of those aged 45–54 (89 percent) and those aged 60–64 (93 percent). Among disabled women, the SMI enrollment rate was 92.6 percent or nearly 3 percentage points higher than that of disabled men. Higher rates for women were found in every age group with somewhat larger differences in those groups likely to have relatively large numbers of veterans. The higher participation rate of women beneficiaries occurred mainly among disabled workers as there was almost no difference in rates by sex among childhood disability and ESRD beneficiaries. Persons of races other than white had somewhat higher participation rates than whites in every age and sex group.

The proportion of HI eligibles also enrolled in SMI was lowest in New England (90.4 percent) and highest in the East South Central States (94.0 percent). Differences in SMI enrollment rates by race and geographic division were also small. In every geographic division the SMI enrollment rate of white women exceeded that of white men (table S). This was also true for both men and women of all other races except in the Middle Atlantic States.

Disabled Persons Newly Enrolled and Terminated in 1973

An average of 31,000 disabled were newly enrolled for HI between August and December 1973 (table T). Nearly

[14] Mildred E. Cinsky, "Health Insurance Coverage of the Disabled," the *Social Security Survey of the Disabled: 1966*, Social Security Administration, Office of Research and Statistics, Report No. 4, August 1968, table 3.

[15] Lawrence D. Haber, "The Disabled Beneficiary—A Comparison of Factors Related to Benefit Entitlement," the *Social Security Survey of the Disabled: 1966*, Report No. 7, June 1969, tables 1 and 2.

one-third were 60–64 years old. Additions to the SMI rolls may exceed the number of persons newly enrolled for HI because of State buy-ins. By the end of 1973, about 150,000 disability beneficiaries were enrolled for SMI under the buy-in program in 46 States (table H), the District of Columbia, and the Virgin Islands.

Persons terminated—Between August and December 1973, 79,000 disability beneficiaries were terminated for HI coverage (table U). More than half of these terminations were transfers from the disability program to the retirement program of persons who attained age 65. The remainder were 29,000 terminations because of death and 5,000 who lost their Medicare coverage because of "recovery." Recovery means the disabled persons condition improved so that they no longer met the medical standards for disability or they had demonstrated, despite their impairment, an ability to engage in substantial gainful activity.

Source of Data

The HIMA file.—The data on age, sex, race, and place of residence of the enrolled population in this report are from the health insurance master (HIMA) file. Changes or corrections in the characteristics of the beneficiaries, new enrollments, and terminations are entered into the file daily. Data for 1973 are from the HIMA file summarized on April 1, 1974.

Place of residence.—The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIMA file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown.—There were 20,000 people with unknown residence recorded in the HIMA file in 1973 (tables 2.6). Most of these entries were the result of processing errors with respect to codes for States or foreign countries. In addition, the number of enrollees whose county of residence was unknown appears in table 2.3 for each State. These were addresses from which the county could not be determined or possibly processing errors.

Race unknown.—On July 1, 1973, the number of aged HI enrollees without a race designation was 567,000 or 70,000 more than the previous year. The relatively high proportion of persons without a race designation among Railroad Retirement Benefits enrollees is due to unresolved data exchange procedures between the SSA and the RRB. The master records of the Board do not contain a race designation. At the start of the Medicare program and at the request of the SSA, the Board gave Medicare race information. Since then the Board has not provided the race of railroad retirement beneficiaries newly enrolled in the Medicare program. Changes in HI enrollment by type of entitlement among aged persons classified as race unknown between 1972 and 1973 are shown below:

[In thousands]

Type of entitlement and sex	HI enrollment		Increase, 1972–1973
	1972	1973	
Total aged race unknown [1]	493	567	74
Entitled to RRB	119	229	110
Entitled to social security	216	266	50
Other enrolled persons	159	143	—16

[1] Persons entitled to social security and railroad retirement benefits are counted in each category separately, but only once in total.

There were 32,000 disabled persons whose race was not known on July 1, 1973. Most of those without a race designation were disabled RRB beneficiaries.

Persons enrolled as of the mid–period of 1973.—Enrollment as of July 1 has been chosen as the population base for utilization rates to be published in other sections of the annual statistical report series. The choice was based on the similarity of July 1 enrollment to a 12-month average enrollment. A comparison of aged HI enrollment by age, race, and sex on July 1, 1973, with an average of 12 monthly enrollment figures in 1973, computed from table 2.5, showed remarkable similarity. Less satisfactory was SMI enrollment for July, which was consistently higher than the 12-month average enrollment. This difference resulted from additions to the rolls on July 1 of persons who requested coverage during the general enrollment period. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the "true" monthly average may be less than that observed in the present data.

Enrollment as of October 1, 1973, has been chosen as the population base for disability beneficiaries enrolled in the last 6 months of 1973.

Provisions of the Law

THE MEDICARE PROGRAM, enacted on July 30, 1965, as Title XVIII—Health Insurance for the Aged—of the Social Security Act, became effective on July 1, 1966. In 1972 major changes were made in the program's provisions by Public Law 92-603.[1] In particular, effective July 1, 1973, Medicare protection was extended to disabled persons entitled to cash disability insurance benefits under the social security or railroad retirement programs, and to individuals under age 65 who require dialysis or kidney transplantation for chronic renal disease. As a result of the 1972 Amendments, the name of the Medicare program was officially changed to "Health Insurance for the Aged and Disabled."[2]

The program makes available two separate but coordinated insurance programs—hospital insurance, covering nearly all persons reaching age 65 as well as disabled persons under 65 years entitled to disability benefits for at least 24 consecutive months, and covered workers and their dependents with chronic renal disease who require renal dialysis or kidney transplant; and supplementary medical insurance, covering those persons eligible for hospital insurance who voluntarily pay the premiums for medical insurance. Moreover, beginning in July 1973, most persons aged 65 or over otherwise ineligible for hospital insurance may enroll voluntarily and pay the premiums for hospital coverage provided they are enrolled for supplementary medical insurance.

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the costs of inpatient hospital care and related health care services provided by skilled nursing facilities (formerly termed extended care facilities) and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program.[3] An exception exists for hospitals certified under special provisions to provide only emergency services.

BENEFITS.

The law provides limits on services which may be covered under the HI program. These limits are based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing facility for 60 continuous days.

Requirements are also established by law for cost sharing by the individual through deductible and coinsurance payments. The Secretary of Health, Education, and Welfare is required each year to determine the deductible amount, by a formula, specified by law, which is based on the average per diem rate for inpatient services furnished beneficiaries during the preceding calendar year. The amount of the deductible tends to approximate the current cost of one day in a hospital. The coinsurance amount for hospital inpatient care is set at one-quarter of the deductible, for lifetime reserve days at one-half of the deductible, and for skilled nursing facility services at one-eighth of the deductible.

Inpatient hospital benefits.—Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private duty nursing), drugs and biologicals, and other services ordinarily furnished by a hospital to its patients.

The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and physiatrists) except for services provided by interns or residents under approved teaching programs.

[1] P.L. 92-603 enacted October 30, 1972.

[2] For a complete description of the provisions of the Social Security Act as amended through January 1, 1973, see *Compilation of the Social Security Laws*, House of Representatives, 93rd Congress, 1st Session, Document No. 93-117, Vol. 1.

[3] For certification requirements see Social Security Administration, Office of Research and Statistics *Medicare: Health Insurance for the Aged, 1968, Section 3: Participating Providers*, (Washington, D.C.: U.S. Government Printing Office), 1971.

The program pays for the "reasonable costs" of covered services in a participating hospital for up to 90 days in a benefit period. Full payment is made for the first 60 days of hospitalization less the deductible of $72 for services received in benefit periods starting in 1973. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of $18 a day (one-quarter of the deductible).

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days are subject to a copayment of $36 a day (one-half of the deductible).

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program as are charges for blood administration, storage, etc.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services may elect to claim payments from the Medicare program for all emergency services rendered beneficiaries in a given year. If the hospital elects this option, reimbursement is made as described above. If the hospital has not elected to bill the program, the beneficiary may submit the itemized bill to the Social Security Administration and claim direct payment. In this case, reimbursement is based on reasonable charges for covered services and amounts to 60 percent of reasonable charges for room and board plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period immediately prior to his eligibility are deducted from his days of entitlement to inpatient psychiatric care in that benefit period but not from the lifetime limitation.

Hospital insurance benefits have been extended to cover payments for inpatient services furnished by a hospital outside the U.S., if the foreign hospital is closer to or more accessible to the beneficiary's residence than the nearest suitable U.S. hospital. For benefits to be payable under this provision the beneficiary must be a resident of the U.S. and the foreign hospital must be accredited by the Joint Commission on Accreditation of Hospitals (JCAH) or accredited by a program having standards equivalent to the standards of the JCAH.

Skilled nursing facility benefits.—Covered extended care services furnished by a skilled nursing facility include nursing care, room and board, physical, occupational, or speech therapy, drugs and biologicals, medical services of an intern or resident-in-training of a hospital having a transfer agreement with the skilled nursing facility; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating skilled nursing facilities for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more; generally the admission to the facility must occur within 14 days of hospital discharge. However, a period of up to 28 days after discharge from the hospital is permitted when the patient's medical condition requires more time before skilled nursing facility care is medically appropriate, or because of a lack of appropriate bed space in skilled nursing facilities in the area. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of $9 a day (one-eighth of the inpatient hospital deductible) as required by law.

For extended care services to be covered, a physician must certify that the patient needs daily skilled nursing care or skilled rehabilitation services and must order the services. The 1972 Amendments include a provision for advance approval of extended care services, whereby the Secretary of Health, Education, and Welfare is authorized to establish, by medical condition, specific periods of time after hospitalization during which a patient will be presumed to require skilled nursing care services. Accordingly, where a patient's physician certifies to the need for such level of care and submits to the skilled nursing facility, in advance of admission, a plan for carrying out the services, the care furnished will be presumed to be the type of care covered as skilled nursing care services.

Post-hospital home health benefits.—Covered home health services may include part-time or intermittent nursing care; physical, occupational or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. In addition, the visits must occur within a year following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or from a covered stay in a skilled nursing facility. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or skilled nursing facility. A plan for necessary home health services must be established by the patient's physician within 14 days after the hospital or skilled nursing facility discharge. The 1972 Amendments include a provision for advance approval of home health coverage similar to that provided for advance approval of skilled nursing care services.

Supplementary Medical Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services; outpatient hospital services; and home health services. Individuals participate voluntarily in the program. Premiums are paid by or on behalf of all enrollees, and are matched by the Federal Government from general revenues.

BENEFITS

Physicians' services covered under the program include visits for surgical and nonsurgical care in the home, office, hospital, and other institutions. The program also pays for other services and supplies, such as: drugs and biologicals that cannot be self-administered, if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests, X-rays, radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, colostomy bags and supplies directly related to colostomy care, including irrigation and flushing equipment; splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment such as oxygen tents, hospital beds, and wheel chairs used in the patient's home (including an institution used as his home); ambulance service where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ; leg, arm, back, and neck braces; artificial legs, arms, and eyes, including replacement if required because of a change in the patient's physical condition; and home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made for up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient speech and physical therapy services. In addition, effective July 1, 1973, the 1972 Amendments provide for services of a physical therapist in independent practice furnished in his office or the patient's home, under a physician's plan. Reimbursement would be limited to not more than $100 of incurred expenses in a calendar year.

Also covered effective July 1, 1973, are some services of a licensed chiropractor. Services covered, however, are limited to treatment by means of manual manipulation of the spine to correct a subluxation demonstrated by X-ray.

For each calendar year through 1972, a deductible of $50 had to be satisfied before payment could be made under the SMI program. For 1973, the deductible was set at $60. Bills count toward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count toward the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time a "carry-over" provision is applied. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year are also credited toward the deductible for the following year.[4]

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physician services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are completely reimbursed.

Where an independent laboratory bills patients directly and accepts assignment, the Secretary is authorized to negotiate a payment rate with the laboratory for the diagnostic tests it provides Medicare beneficiaries. Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible

[4] Expenses incurred in the last quarter of 1972 and carried over to 1973 cannot exceed $50. An individual must incur additional expenses of $10 to meet the deductible for 1973.

and coinsurance requirements do not apply. Hospital services incident to outpatient care are subject to the deductible and are reimbursed on the basis of 80 percent of reasonable costs. Home health services are subject to the deductible; however, coinsurance payments were eliminated for such services furnished after December 1972.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness; recognition of incurred expenses is limited to the lesser of $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to $250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

Hospital Insurance.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons who are entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own covered employment or as a dependent or survivor of an insured worker. The provision applies, generally, to a person aged 65 or over who (1) attained age 65 before 1968 or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attains age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year--six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970 and so on.

Hospital insurance protection under certain circumstances can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Effective July 1, 1973, persons entitled for not less than 24 consecutive months to cash benefits under the social security or railroad retirement programs because they are disabled, are eligible for benefits under the hospital insurance program. Those covered would include disabled workers under 65 years, disabled widows and disabled dependent widowers between the ages of 50 and 65; women age 50 or older entitled to mother's benefits who for 24 months met requirements for disability benefits except for actually filing a claim, and persons aged 18 or over who receive monthly benefits because they became disabled before reaching age 22. A person must be disabled for 5 months before disability benefits can begin. Thus, Medicare coverage begins with the thirtieth month after the first full calendar month of disability.

Hospital insurance protection is also extended, effective July 1, 1973, to persons under age 65 who are currently or fully insured or entitled to monthly social security benefits, and to their spouses or dependent children, who have chronic renal disease and require renal dialysis or kidney transplant. Eligibility for coverage begins with the third month after a course in renal dialysis begins and ends with the twelfth month after the person had a kidney transplant or dialysis was terminated.

The law now permits persons reaching age 65 who are ineligible for hospital insurance either as cash beneficiaries or under the transitional provisions to enroll, on a voluntary basis, for hospital coverage.

Coverage under this provision is effective July 1, 1973, and the premium is set at $33 per month, the full cost of this protection. Individuals may enroll in the hospital insurance program only if they also enroll in the supplementary medical insurance program. The first enrollment period under this provision began December 1, 1972, and ended August 31, 1973. To be covered on July 1, 1973, persons must have enrolled before May 31, 1973. Thereafter, enrollment periods for hospital protection are the same as the initial and general enrollment periods under supplementary medical insurance.

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions.

Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Supplementary Medical Insurance.—Persons entitled to benefits under the hospital insurance program, retired Federal employees, aliens residing in the United States, and persons not eligible for hospital insurance under the transitional provisions may participate voluntarily in the

SMI program. To enroll prior to July 1, 1973, the person must file a written request with the Social Security Administration during an enrollment period which is open to him. To prevent loss of entitlement or delay, the 1972 Amendments provide for automatic enrollment in supplementary medical insurance of persons as they become entitled to hospital insurance. An individual can decline SMI enrollment. If he withdraws before his coverage starts, there is no premium liability, nor is he charged with an enrollment.

Individuals may enroll in the SMI program only during specified periods—the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual is first eligible and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he is first eligible, his coverage is effective with the month in which he is first eligible; if he enrolls during the month he is first eligible, his coverage begins the following month; if he enrolls in any of the 3 months after he is first eligible, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, there are general enrollment periods from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or who previously terminated their enrollment and wish to re-enroll. A person who enrolls during a general enrollment period is covered under SMI beginning with July 1 of the year in which he enrolls. Prior to the 1972 Amendments, an eligible individual had to enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. The 3-year limitation is no longer applicable. Re-enrollment is allowed only once.

A State may enroll eligible individuals who receive cash payments under public assistance programs or are otherwise eligible for medical assistance under Title XIX if: (a) prior to January 1, 1970, the State requested that a State-Federal enrollment agreement be established; and (b) the State pays the necessary premiums.

For a person 65 years and over, enrollment terminates with the beginning of the month following the month of death. For a person covered on account of disability, coverage terminates with the end of entitlement to benefits based on disability. For a person covered because of chronic renal disease, coverage ends 12 months after he had a transplant or dialysis treatment ends. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time; their coverage is terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of their desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated. The 1972 Amendments extend the 90-day grace period for an additional 90 days where the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period.

Financing the Program

Hospital Insurance.—The hospital insurance program is financed primarily through a schedule of increasing tax rates on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the rates are applied began at $6,600 for calendar year 1966; it increased to $7,800 effective with 1968 and $9,000 effective with 1972. The 1972 Amendments established an additional schedule of increases to $10,800 for 1973, and $12,000 for 1974 with future automatic increases as wages rise.

The same tax rate applies to employees, employers, and self-employed persons. The rate has been 0.60 percent for each year 1968-1972. The scheduled rate for 1973 through 1977 is 1.00 percent, and rates increase for future years up to 1.45 percent for 1986 and thereafter. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in the Federal Hospital Insurance Trust Fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The hospital insurance trust fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. For January 1973 there were approximately one million such persons, a decrease from the 2.6 million who so qualified in 1966. Amounts paid for hospital insurance coverage by persons voluntarily paying the premiums shall be deposited to the credit of the Federal Hospital Insurance Trust Fund.

Supplementary Medical Insurance.—Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching

amount is paid by the Federal government from general revenues. Benefits and administrative costs are paid from monies in the SMI trust fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal Civil Service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance. For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

Amount of Premium.—The Secretary of HEW is directed by law to determine the SMI premium rate on an annual basis. The dollar amount is required to be sufficient to produce revenue equal to one-half of the expected benefit and administrative costs payable under SMI during the period for which the premium rate applies. The rate is determined in December of each year and is applicable for 12 months beginning with the following July.

The premium rate in the first half of 1972 was $5.60 per month. The rate was raised to $5.80 effective July 1972, and to $6.30 beginning July 1973.[5]

Under a new provision of the law, the premium rate after July 1973 will increase only in the event of a general cash benefit increase—either an automatic increase resulting from an increase in prices or a general social security benefit increase enacted by Congress. The percentage increase in the premium in any given year may not exceed the percentage increase in cash benefits.

Administration of the Program

Hospital Insurance.—Under the hospital insurance part of the program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered under the program; makes payment; and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services; (2) serving as a center for communicating with providers; and (3) making audits of provider records.

Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Under the law, the reasonable costs of services is determined pursuant to regulations established by the Secretary of HEW. These regulations prescribe the method(s) which are used to determine costs, and the items to be included; they take into account both direct and indirect patient care costs.[6] Reimbursement for services rendered in 1972 also is subject to regulation by the Price Commission.[7] To implement requirements established by the Price Commission, and after coordination with other involved agencies, the Social Security Administration established standards under which an intermediary may presume compliance by a provider with economic stabilization regulations. In order for an intermediary to presume compliance, two conditions must be met: (a) the provider must certify to its compliance with economic stabilization regulations; and (b) the provider's Medicare reimbursable costs (i.e., reasonable costs as determined under Medicare requirements) must be within certain specified levels, no more than 109 percent of the institutional provider's or 105.5 percent (108 percent effective October 1, 1972) of the noninstitutional provider's total Medicare reimbursement for its previous reporting year under the program, expressed on an appropriate unit of service basis (i.e., reimbursement per inpatient day, visit, or occasion of service).

[5] On June 14, after the new premium rate for fiscal year 1974 had been formulated the President announced a price freeze for 60 days. As a result, the actual premium collected for July 1973 was $5.80. The new rate became effective in mid-August and resulted in a prorated amount of $6.10 for August 1973. Beginning in September 1973 and subsequent months the full premium rate of $6.30 was in effect.

[6] For details see 20 *Code of Federal Regulations*, Chapter III, Part 405, Subpart D.

[7] *6 Code of Federal Regulations*, Chapter III, Part 300, Subpart A.

Where an intermediary cannot presume compliance, the provider is referred to the District Director of Internal Revenue for a determination regarding the allowability of cost increases under the economic stabilization regulations.

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program on a physician's behalf for physician services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payment can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance.—Under the medical insurance program, the Secretary of Health, Education, and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unnecessary utilization of services.

The allowable charge, on which the Medicare SMI payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the services; (2) the prevailing charges in the locality for similar services; (3) the charge applicable for comparable services under comparable circumstances to the policyholders or subscribers of the carrier.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the immediately preceding calendar year. The revised allowable charge levels go into effect on July 1 of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1971, allowable charge levels were calculated from actual charge levels for calendar year 1970. However, allowable charges could not exceed the upper limit of the prevailing charges set by regulation at the 75th percentile of customary charges (weighted by frequency) made for similar services.

For the 12-month period beginning July 1, 1972, the allowable charge levels are calculated from actual charge levels for calendar year 1971. However, because of a ruling by the Price Commission, only 40 percent of these calculated increases in allowable charge levels can be recognized for the 12-month period beginning July 1, 1972.

The ruling of the Price Commission is that the Medicare allowable charges in effect on November 13, 1971, must be considered as base prices for Phase II purposes, and that, as a result, they may not be increased by more than 2.5 percent in the aggregate during the fiscal year beginning July 1, 1972. Based on actual increases in physician and supplier billings in calendar year 1971, the charges allowed under the Medicare program for the 12-month period beginning July 1, 1972, would have been increased by about 6.2 percent in the aggregate. To implement the Price Commission's ruling, therefore, only 40 percent (2.5 is about 40 percent of 6.2) of the increases that would ordinarily have been allowed will be recognized in calculating allowable charges for the fiscal year beginning July 1, 1972.

The Phase III economic stabilization regulations continued the restraints that were applicable under Phase II by imposing a 2.5 percent ceiling on charge increases during the fiscal year beginning July 1, 1973. The combined effect of the Phase II and Phase III rulings is to limit increases for the 2-year period to 5.06 percent (2.5 percent compounded over a 2-year period). It has been estimated that the actual rate of increase over the 2-year period was about 9.5 percent. Consequently, to limit the aggregate screen increases over the 2-year period to 5.06 percent, only 55 percent (5.06 is about 55 percent of 9.5) of the increase that would ordinarily have been allowed for the 2-year period will be allowed.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the benefits to a physician or other supplier of services who is willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the $60 deductible (effective 1973), if applicable to the current bill.

Services furnished by group practice prepayment plans (GPPP's) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Social Security Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

HEALTH MAINTENANCE ORGANIZATIONS

At present, group practice prepayment plans providing comprehensive health services on a prepaid capitation basis cannot be reimbursed by Medicare through a capitation rate which would constitute a single payment for all covered services furnished to their beneficiary enrollees. Instead, prepayment plans are reimbursed under Medicare on a capitation basis only for the costs of providing physicians' and related services.

Reimbursement for inpatient care in a hospital, extended care services, or home health services is made separately on a cost basis to the provider of the service which may, of course, be an integral part of the group practice prepayment plan.

The 1972 Amendments provided that, effective July 1, 1973, individuals eligible for both HI and SMI or for SMI only could choose to have their covered health care provided through a Health Maintenance Organization (HMO). An HMO is an organization which provides to enrolled individuals, either directly or by arrangement with others, comprehensive health services on the basis of a predetermined periodic rate without regard to the frequency or extent of services furnished to a particular enrollee. To be an HMO for Medicare purposes, the organization must provide all the services and benefits covered under hospital insurance and medical insurance which are available to individuals residing in the geographic area served by the HMO.

Beginning July 1973, two new methods of reimbursement—incentive reimbursement and cost reimbursement--both involving a single capitation rate for services covered under Medicare and provided to the organization's Medicare enrollees, will be available to qualified organizations providing comprehensive health services to Medicare beneficiaries on a prepaid capitation basis. Under the incentive reimbursement option, which would be available only to well-established HMO's that meet the full statutory definition of an HMO as well as other requirements, the HMO would be at risk for the services it provides to its Medicare enrollees. The HMO would share with the Medicare program the "savings" to the program resulting when the HMO provides services to Medicare beneficiaries at a lower cost than would have been incurred if the services had been provided outside the HMO. Under the cost reimbursement option, intended primarily for new HMO's, the organization would not be at risk, but would be paid the full reasonable costs it incurred in providing covered services to its Medicare beneficiaries.

A beneficiary enrolled with an established HMO which uses the risk-sharing method of reimbursement would receive covered services only through the HMO, except for emergency services, and urgently needed services received when he was temporarily outside the HMO's service area. A beneficiary enrolled in an HMO receiving cost reimbursement would not be required to use the HMO as his single source of health care. Payment would be made by Medicare in the usual manner for services he received outside the HMO.

General Tables

Notes

Health insurance for the aged and disabled.—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over and disability beneficiaries under age 65.

End–stage renal disease.—Persons eligible solely on the basis of end-stage renal disease (ESRD) includes those under 65 years old eligible under the Social Security Amendments of 1972, Section 299I of Public Law 92–603. While the law refers to chronic renal disease the term end-stage is generally used as it is more appropriate to describe that stage of renal impairment which cannot be favorably influenced by conservative management alone, and requires dialysis and/or kidney transplantation to maintain life or health.

Type of coverage.—The program provides two types of insurance: a basic hospital insurance plan and a voluntary supplementary medical insurance plan.

Personal characteristics.—

Age: In completed years at last birthday on the reference month of the table for persons alive on December 31, 1973. For persons ever enrolled during the year in completed years on the date of death.

Race: White, all other races, or unknown as entered into the health insurance master file from basic records completed by the primary beneficiary. Race unknown whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex: As designated in the HIMA file.

Persons ever enrolled: All persons eligible for benefits at any time during 1973.

Geographic classifications.—Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIMA file on April 1, 1974, regardless of the reference date of the table.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia and residence unknown.

Other outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County.—The primary divisions of the 50 States are counties. In Louisiana, however, divisions are called parishes. Alaska is divided into 21 economic areas, shown here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada, and Virginia. In Puerto Rico divisions are called municipios.

County unknown.—Persons whose mailing address does not permit identification of county of residence are included in figures for States, but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's, with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as published by the National Bureau of Standards under the direction of the Office of Management and Budget.[1] Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants based on the 1970 Census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIMA record file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

SMSA, Metropolitan SEA.—See above. Only areas in the United States are listed.

[1] National Bureau of Standards, U.S. Department of Commerce, Federal Information Processing Standards Publication 8–2, *Standard Metropolitan Statistical Areas,* (Washington, D.C.: U.S. Government Printing Office, November 1972).
